2 August 1951

From: Resident Inspector, Portland Office  
Assistant Industrial Manager, Astoria  
To: Port of Portland, Oregon  
Mr. J. Healey, Supt. of Dry Docks  
Swan Island, Portland, Oregon

1. The present ship repair program for the Portland area will require the overhaul of seventy-seven (77) Naval vessels during this fiscal year (1 July 1951 to 1 July 1952). This same program will be continued or increased for the fiscal years 1953 and 1954. It is very essential that Dry Docks be available for this program.
2. The present contractor, Guy F. Atkinson Company, dba Willamette Iron and Steel Company has a total of twenty-three (23) Naval vessels to dry dock by the 21 November 1951. Other contractors will bid for this work from time to time and at this date it is unknown who will be the successful bidders. As a consequence, it will be necessary to make application for Dry Docking facilities for this year's overhaul program, by the U. S. Navy.
3. Attached is a list of the Naval vessels to be dry docked during this fiscal year. The estimated docking dates for St. John's Dry Docks are shown, with the designating number of these ships. Dry Dock #2 will be required for LST type vessels. All others can be docked in #1 Dry Dock.
4. It is hoped that these dates will be met promptly and that the Dry Dock will be available as indicated.

*R. E. McCosh*  
R. E. McCOSH  
Lieutenant, USN
